It is the company's workhorse that well represents our passion for making wine.

After having chosen the harvest period in a maniacal way to establish the perfect degree of ripeness with the highest peak of aromas, the grape is harvested, the press is integrated and processed in such a way that it spends as little time as possible from harvesting to processing to obtain a must of the highest quality. When needed, it is fermented in autoclaves at a temperature of 15 °C until it reaches 5% of alcohol and 2,5 atm of pressure.
